## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 16, 2002, has been entered.

### ***Response to Amendment***

2. Amendment C, submitted as Paper No. 16 on December 16, 2002, has been entered. Independent claims 12 and 17 have been amended as requested. New claims 20-24 have been added. Thus, the pending claims are 12-24.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 12-24 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claims 12 and 17 have been amended to limit

Art Unit: 1771

the sheath to not include a thermosetting material. The specification does not provide support for this limitation. Any negative limitation or exclusionary proviso must have basis in the original disclosure. See *Ex parte Grasselli*, 231 USPQ 393 (Bd. App. 1983), *aff'd mem.*, 738 F.2d 453 (Fed. Cir. 1984). The mere absence of a positive recitation is not basis for an exclusion. Any claim containing a negative limitation which does not have basis in the original disclosure should be rejected under 35 U.S.C. 112, first paragraph as failing to comply with the written description requirement.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 17 and 23 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

7. Claim 17 stands rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 17 is indefinite because it is unclear if the first occurrence of the term "yarns" in line 7 of the claim refers to the warp yarns, the fill yarns, or both the warp and fill yarns.

8. Claim 23 is indefinite for the use of the phrase "conventional fibers." What is it about the fibers that makes them "conventional?" It is unclear what the scope of the phrase is.

***Claim Rejections - 35 USC § 102***

9. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

10. Claims 12-15 and 17-19 stand rejected under 35 U.S.C. 102(b) as being anticipated by JP 06-2240 issued to Imose for the reasons of record.

Applicant's amendments to claims 12 and 17 are insufficient to withdraw said rejection, since Imose does not teach or suggest the use of a thermoset component in the sheath material. Specifically, Imose teaches a thermo-fusible component comprising a thermoplastic fiber having a melting point of 170°C or less and a non-thermo-fusible component, which is defined to be another fiber with a melting point 50°C higher than the thermo-fusible component (page 7, [0010]). Nowhere does Imose teach a *thermoset* material.

11. Claims 20-24 are rejected under 35 U.S.C. 102(b) as being anticipated by the cited Imose reference.

New claims 20-24 differ from unamended claims 12-16 in that claim 20 limits the composite yarns to 'consist essentially of' instead of 'comprise.' However, this change in claim language is insufficient to overcome the Imose reference. Specifically, the transitional phrase "consisting essentially of" limits the scope of a claim to the specified materials or steps "and those that do not materially affect the basic and novel characteristic(s)" of the claimed invention. *In re Herz*, 537 F.2d 549, 551-52, 190 USPQ 461, 463 (CCPA 1976) (emphasis in original). For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." See, *PPG Industries*

Art Unit: 1771

*v Guardian Industries*, 156 F.3d 1351, 1354, 48 USPQ2d 1351, 1355 (Fed. Cir. 1998). (“PPG could have defined the scope of the phrase consisting essentially of for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the basic and novel characteristics of the invention.”). See also *In re Janakirama-Rao*, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963). If an Applicant contends that additional steps or materials in the prior art are excluded by the recitation of “consisting essentially of,” Applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of Applicant’s invention. *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). See also *Ex parte Hoffman*, 12 USPQ2d 1061, 1063-64 (Bd. Pat. App. & Inter. 1989). Thus, claims 20-24 are rejected as being anticipated by the cited Imose reference.

### ***Claim Rejections - 35 USC § 103***

7. Claim 16 stands rejected under 35 U.S.C. 103(a) as being unpatentable over the cited Imose reference in view of *Woven Pile Fabrics in the Automotive Industry*, Moulin and Van De Wiele, for the reasons of record.
